

# FULLY VACCINATED COVID-19 TESTING RECOMMENDATIONS

**DID YOU KNOW?** Even if you're **fully vaccinated**, you should still get tested for COVID-19 if you've had close contact with someone who has COVID-19 or are experiencing symptoms.

According to the Centers for Disease Control and Prevention (CDC), it is recommended that you wear a mask indoors and in public for at least 14 days following exposure or until you test negative, even if you're fully vaccinated.

If your test result is positive, isolate at home for 10 days

It is recommended to get tested 5 - 7 days after your exposure, even if you don't have symptoms

If you experience symptoms of COVID-19, even if you're fully vaccinated, you should get tested and stay home

**To make an appointment for a COVID-19 test, visit [sbcovid19.com](https://www.sbcovid19.com) or call (909) 387-3911**
